Fivefold: How to Play

Fivefold is a dice game for 2 to 4 players. Everyone fills in their own 13-box scorecard; the highest total wins.

Your turn

- Roll the five dice. You may roll up to **three times** in a turn.
- After the first roll, tap any dice you want to **hold** (they rise and show HELD), then roll again: only the dice you did not hold are rolled.
- After any roll, choose one empty box on your scorecard. Your possible score for each box is shown, but nothing is recorded until you choose. Then the next player rolls.
- Every box must be filled once. If your dice do not fit a box you still want to fill, you can score **0** there; you will be asked to confirm.

The boxes

- **Ones to Sixes:** add up only the dice showing that number.
- **Upper bonus:** 35 extra points if your Ones to Sixes add up to 63 or more (for example, three of each number).
- **Three of a Kind:** at least three dice the same; score the total of all five dice.
- **Four of a Kind:** at least four the same; score the total of all five.
- **Full House:** three of one number and two of another: 25.
- **Small Straight:** four numbers in a row, such as 2-3-4-5: 30.
- **Large Straight:** five numbers in a row: 40.
- **Five of a Kind:** all five dice the same: 50.
- **Chance:** any dice; score their total.

Simplified rules

This version deliberately leaves out two rules found in some five-dice games: there are **no extra bonuses** for rolling Five of a Kind again, and **no "joker" rules**. Five of the same number scores 0 as a Full House or a straight.

The end

After 13 rounds every box is full. Totals include the upper bonus (listed at the end as an adjustment). The highest total wins; equal top totals tie.

The dice are rolled by the game server, never on your device, and every roll is saved, so a reload or a slow connection never changes your dice.
